ESCAPADE

The Performance Proof is in the Standard Features

✓ Chassis

Escapade Trailer's unique fully integrated modified T-Chassis improves aerodynamics, enhances the cargo deck's strength and ensures more stable performance at any speed.

✓ Suspension

Designed by the industry leader – Progressive Suspension, Inc. – the fully adjustable air shock and internal coil spring with a trailing swing arm produces a totally independent suspension system. That means that the Escapade Trailer will not bounce when towed, empty or full. Guaranteed.

The fully adjustable air shock and internal coil spring with a trailing swing arm produces a totally independent suspension system.

✓ Lighting

Escapade Trailer's lighting system exceeds the standards set by the USDOT. That means safety and with no external wiring except at the tongue connection, that means reliability too.

✓ Tracking

The larger than average wheels and tires on an Escapade Trailer equal superb tracking, and because they are a standard automotive size, they can easily be replaced, even in those out-of-way rural areas.

✓ Finish

Escapade Trailer has an industry wide reputation for flawless color matches and paint finishes without air bubbles, dust or other imperfections. We stand behind that statement with a money back guarantee.

ESCAPADE *Elite*

Never before has a trailer been so deserving of its name than Escapade's **Elite** trailer. Designed specifically with the GL1800 Goldwing in mind, the result is a trailer that beautifully incorporates the sleek lines and style characteristics of the Goldwing while maintaining the unsurpassed quality and engineering for which Escapade is renowned. You'll be amazed at the value you'll receive with this trailer. All of the great features of its predecessors—the SE and LE—have been incorporated into the Elite. These standard features and optional accessories serve to make the Elite the finest example of craftsmanship and style on the road, including a 10 year warranty on the trailer frame.

(Shown with optional spoiler, luggage rack, lightbar, mud flaps & aluminum wheels.)

Escapade LE

(Shown with optional spoiler, luggage rack, bumpers, mud flaps & aluminum wheels.)

Escapade SE

Designed specifically with the Gold Wing GL1500 in mind, the Escapade SE offers cleaner, sleeker lines that conform to your cycle, while the chrome trim and fresh color schemes add subtle touches of style. And if the lighting package looks familiar that's because it was designed to match the lights on your Gold Wing.

While other manufacturer's offer a similar product, none compare to Escapade in quality, value or price. We've spent more than 30 years establishing our reputation as the premier manufacturer of motorcycle touring accessories, so you know you're getting the best value for your money.

(Shown with optional chrome tongue, chrome wheels & luggage rack)

The Escapade LE offers an incredibly spacious 25 cubic feet of storage. We've built in a recessed compartment for a spare tire, so you have maximum room for your gear. And for those special nights when you're on the road, you can keep looking sharp with your evening wear in the optional custom hanging garment bag that attaches to the inside of the lid. When you open the LE's lid, it raises to almost 90 degrees—that means it's out of the way so you can easily reach to even the farthest corner.

Amazingly these refinements don't come at the cost of performance. The Escapade LE means that style, performance and affordability are now standard in the largest capacity high performance trailer available.

ESCAPADE

Eclipse & Classic

The Eclipse delivers all of the great design, style and engineering qualities of the Escapade Classic, but at a fraction of the price. People were saying they wanted a quality engineered trailer at a lower price because they only used it once or twice a year. We responded with the Eclipse. To make the price more affordable, we replaced the air shocks with Progressive coil over piston shocks and offer the finish in a black or white polished gel coat only. Available with several factory-installed options, the Eclipse will follow beautifully to wherever your journeys may take you. The Classic is the same trailer but with color match and air shocks.
